Cornerstone Health Care Increases United Way Contribution by 27%

High Point, NC — Cornerstone Health Care announced that their 2009 employee campaign raised \$157,283 for the United Way of Greater High Point, a 27% increase over the employee contributions made in 2008. Cornerstone, which has practices located in 12 cities throughout the Triad, also announced pledges of \$9,500 to the United Way of Forsyth County and \$7,310 to the United Way of Randolph County. Cornerstone Health Care's campaign included donations from among the over 13,000 employees and 150 physicians serving patients from 51 individual practices.

According to Bobby Smith, President of the United Way of Greater High Point, this significant increase by one of the city's largest employers is particularly appreciated during the 2009 campaign. "As we close out a challenging 2009 campaign and a difficult year, we are extremely grateful for the generosity of the employees at Cornerstone Health Care. As the front line leaders in health care in our community, they are well aware of the many needs that exist among our neighbors in Greater High Point, and as always, they responded to our call for help. The success of their employee campaign is remarkable, and their support will help us help a lot of people."
